Integrative Cancer Research Workspace

Roles Defined for the CDE Curation Process

January, 2005

UML Modeler

- Owner/creator of the project UML model

Subject Matter Expert

- A person who is an expert in a data domain

Curator

- Uses the caDSR tools for the creation and maintenance of metadata and may have input during UML modeling

- Each development team should appoint one curator

- Conversant enough in the data domain to assist a subject matter expert in the creation of data elements.

Preceptor

- A new role, defined for caBIG

- A metadata expert who will help new curators with their responsibilities

- One or more individuals from the caDSR team will be assigned as preceptors to the ICR Workspace.

VCDE Reviewer

- Cancer center member of the VCDE workspace

- Provides support for the use of domain data standards

- Note that this person is not a curator

Context Administrator

- For the caBIG Context in the caDSR, there will be an administrator for each domain workspace. This person is the point of contact for general questions about CDEs created by this group.
